About me   I'm a web developer and I have recently graduated from the Firehose Project web developer bootcamp. I am seeking employment as a junior developer. I am also looking for an opportunity to sharpen my skills with a group of talented developers, and potentially pick up new skills and toolsets in the process.

PREV. WORK   **Freelance Web Development,** September 2018 - Present

- My business where I created websites for small businesses.

- I primarily used PHP, MySQL, and PHPMyAdmin for the backend

- CSS and Bootstrap for responsiveness

PROJECTS: Yelp Clone

- This project was to recreate the review website Yelp

- Added user authentication support using Devise

- Used Google Map API to allow restaurant entries to be tied to a physical location

- Created a Postgresql database to store restaurant information and user ratings

- Created a system to upload and store images

Video Streaming Platform

- This project was to create a website that allowed video hosting with payment processing

- Created a system to upload videos

- Used Stripe to create credit card payment capabilities

- Managed user roles such as admin, teacher, and student, each with different capabilities.

Instagram Clone

- Created with Ruby on Rails

- Devise for user authentication

- Created a database and system to upload and store images as well as comment

EDUCATION   **Firehose Project Web Development Bootcamp**

COURSEWORK   Full Stack Developer Program

- Dynamic and responsive front end development with CSS, Bootstrap, Javascript and jQuery

- Back end development with Ruby on Rails and Postgresql

SKILLS   Application: PHP MyAdmin, Photoshop , InDesign, Vagrant

Technologies: HTML, CSS, Ruby on Rails, PHP, Bootstrap, React, Postgresql, MySql, JavaScript and jQuery
